ABSTRACT

This research aim to measure influence skill-training (X1) and self-supporting attitude (X2) to entrepreneur potency of BLK Boyolali (Y) by together (F test) and also by partial (t test). Result of analysis showed constanta value = 0.243 and coefficient regression value for skilled training = 0.534 and self-supporting attitude = 0.545; while hypothesis test by partial (t test) showing result t for the X1 = 3.937 and X2 = 3.828 signifikan α = 5% bigger than t tables = 2.02. From other sideing that value F test show value 31.779 signifikan α = 5% bigger F tables = 3.18; this means indicating that skilled training and self-supporting attitude have positif influence on signifikan to student entrepreneur potency in BLK Boyolali either through partial and also together and pursuant to R² value = 0.565; can be interpreted that entrepreneur potency can be explained by skilled training and self-supporting attitude equal to 56.5%. Conclusion from this research is hypothesis expressing skilled training and self-supporting attitude have positif influence and proven signifikan its truth.
