HALAMAN JUDUL........... .............................................................................................................. i
LEMBAR PENGESAHAN ............................................................................................................. ii
ABSTRAK ..................................................................................................................................... iii
ABSTRAC ...................................................................................................................................... iv
KATA PENGANTAR ....................................................................................................................... v
DAFTAR ISI ............................................................................................................................. vi
DAFTAR GAMBAR ..................................................................................................................... vii
DAFTAR LAMPIRAN ................................................................................................................... ix

BAB I. PENDAHULUAN ............................................................................................................. 1
1.1 Latar Belakang......................................................................................................................... 1
1.2 Tujuan Khusus ....................................................................................................................... 2
1.3 Keutamaan Penelitian ......................................................................................................... 2

BAB II. STUDI PUSTAKA ........................................................................................................... 3
2.1 Tinjauan Pustaka .................................................................................................................... 3
2.2 Dasar Teori .......................................................................................................................... 4

BAB III. METODE PENELITIAN ............................................................................................... 7
3.1 Desain Penelitian .................................................................................................................. 8
3.2 Pembuatan dan Instalasi Alat .............................................................................................. 8
3.3 Burner Variasi I .................................................................................................................... 9
3.4 Burner Variasi II .................................................................................................................. 10
3.5 Burner Variasi III ................................................................................................................ 12
3.6 Peralatan Penelitian .......................................................................................................... 13
3.7 Pengujian Penelitian ......................................................................................................... 16

BAB IV. HASIL DAN PEMBAHASAN ....................................................................................... 18
4.1 Perbandingan Unjuk Kerja Pada Burner Variasi I ............................................................. 18
4.2 Perbandingan Unjuk Kerja Pada Burner Variasi II.......................................................... 22
4.3 Perbandingan Unjuk Kerja Pada Burner Variasi III ..................................................25
4.4 Perbandingan Unjuk Kerja Kompor Methanol Dengan Minyak Tanah ..................28
BAB V. KESIMPULAN DAN SARAN .............................................................................30
5.1 Kesimpulan ..................................................................................................................30
5.2 Saran ............................................................................................................................30
